

Playpark report April 2021:

Over the last year the playpark has been closed for a time due to the Covid 19 pandemic and latterly has been open as permitted. New relevant signage has been put up, with more to come. The gates have been removed as they are a high touch area.

We have ordered new rockers but have not yet got a date for installation.

Tony and Neil Hobbs have done a lot of work making good the multiplay - building new steps and re-fixing the slides safely. It is ongoing with work on the clatterbridge. Paul has made good inroads on painting the fencing.

The school council have been doing their inspections and asked if the fence which is constantly suffering from breakages and damage could be removed altogether. Fran responded to them explaining that it not possible under the risk assessment to remove the fence which would leave the play area open to balls and larger children from the football field running into the play area.
